# IRVINGTON COMMUNITY SCHOOL

## 2010-2011 Performance Analysis

Core Question 1: Is the educational program a success?

1.1. Is the school making adequate yearly academic progress (AYP), as measured by the Indiana		
Department of Education's system of accountability?		
STANDARD	School has met AYP across all student subgroups for the last two years.	

#### 2010-11 Performance: Approaching Standard

The Irvington Community School (ICS) did not achieve Adequate Yearly Progress (AYP) toward statewide academic goals set by the Indiana Department of Education (IDOE) in 2010-11. The IDOE determined that ICS made AYP for the 2010-11 school year in 16 of the 21 subgroups for which it was evaluated. The chart below details the school's 2010-11 performance in each subgroup.

Student Group	English	Mathematics	Participation English	Participation Math	Attendance
Overall	Y	Y	Y	Y	N
Black	Y	Y	Y	Y	
White	Y	Y	Y	Y	
Free/Reduced Lunch	Y	Y	Y	Y	
Special Education	N	N	N	N	

Attendance rate determination is made only for "All students," not for subgroups.

Based on the performance in 2010-11, the school did not meet the Mayor's Office standard for this indicator.

1.2. Are students making substantial and adequate gains over time, as measured using value-added analysis?	
STANDARD	Value-added analysis indicates that more than 75%-89% of tested students made sufficient gains.

### 2010-11 Performance: Approaching Standard

Under the Indiana Growth Model, the IDOE compares each student's growth on ISTEP+ from one year to the next and determines whether students made 'Low Growth', 'Typical Growth', or

'High Growth' compared to their academic peers. To achieve the Mayor's standard for this indicator, 75% of a school's students must demonstrate sufficient gains – or must achieve either 'Typical Growth' or 'High Growth'.

Subject	Low Growth	Typical Growth	High Growth	Total
				Sufficient
				Gains
English/Language	35.8%	31.2%	33.0%	64.2%
Arts				
Math	43.3%	29.2%	27.5%	56.7%
Weighted Average				60.4%

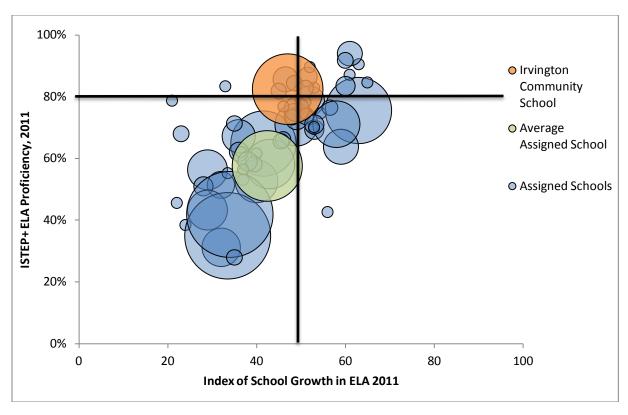

SOURCE: IDOE. The weighted average is calculated by taking the sum of the total number of students who achieved 'Typical' or 'High' Growth in ELA and the total number of students who achieved 'Typical' or 'High Growth' in Math, divided by the sum of the total number of students assessed under the Growth Model in ELA and the total number of students assessed under the Growth Model in Math.

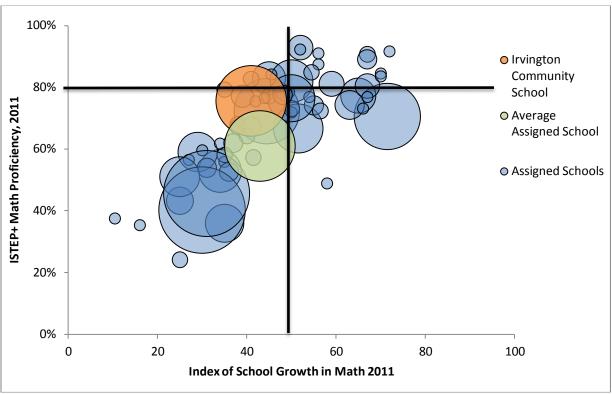

A number of students are losing ground in both English/Language Arts and Math (35.8% and 43.3%, respectively). A weighted average across both subjects reveals that 60.4% of students at Irvington Community School demonstrated sufficient gains in 2010-2011. Thus, Irvington Community School was approaching the Mayor's Office standard for this indicator.

1.3. Is the school outperforming schools that the students would have been assigned to attend?	
STANDARD	School's overall performance in terms of both proficiency and/or growth is generally as
	good as that of the schools the students would otherwise have been assigned to attend.

#### 2010-11 Performance: **Meets Standard**

The Mayor's Office compared the performance of ICS to that of Marion County public schools students would have been assigned to attend, based on their place of residence. The overall proficiency and growth of students at ICS outpaced that of their peers in English/Language Arts (ELA) and outpaced their peers in proficiency but was not generally good as their peers in growth in Math. Therefore, in 2010-11, the school's performance met standard for this indicator.

How to read these figures: Blue bubbles represent the traditional public school that students would have been assigned to attend if they did not attend ICS. The size of each blue bubble is proportional to the number of ICS students who would have attended that school. The horizontal axis line represents the average ISTEP+ performance in Indiana, while the vertical axis line represents 50<sup>th</sup> growth percentile. Schools located above the horizontal axis had better-than-average performance, while schools

 $located\ to\ the\ right\ of\ the\ vertical\ axis\ showed,\ better-than-average\ improvement.\ The\ green\ bubble\ represents\ the\ average\ performance\ and\ improvement\ of\ all\ assigned\ schools.\ The\ orange\ bubble\ represents\ the\ performance\ of\ ICS\ students.$ 

1.4. Is the school meeting its school-specific educational goals?	
STANDARD	School has clearly met its school-specific educational goal.

**Not applicable.** The school did not have school-specific educational goals to be evaluated in 2010-11.
